

TRACK SESSIONS: Thursday 28 May

14:00-16:00	TRACK 1: MOVING TO AN IMPLEMENTATION SCIENCE																										
	CASES FROM THE FIELD																										
14:00-15:00	<p>WEBINAR: POSTER SESSION – CASES FROM THE FIELD</p> <p>Poster presentations: 0-5 min: Introduction 5 - 55 min: 3 blocks of 4 to 5 pre-recorded pitches of max 90 seconds each block followed by a 10 minute Q&A 55 - 60 min: Closure poster session</p> <hr/> <table> <tr> <td>Kale & Chemburkar</td> <td>Demystifying Groundwater Science and Building Institutions for Sustainable Aquifer Management</td> </tr> <tr> <td>van Nieuwaal et al</td> <td>From capacity development to implementation science in urbanizing deltas</td> </tr> <tr> <td>Nguyen et al</td> <td>Transitioning to climate – resilient and sustainable livelihoods in the Vietnamese Mekong delta: barriers and the way forward</td> </tr> <tr> <td>Viacheslav & Bolko</td> <td>Role of Hydrometeorological Sciences in a Capacity Development of Water-Depended Sectors of Economy: Ukrainian Reality and Perspective</td> </tr> <tr> <td>Kunlere & Kunlere</td> <td>Climate Change, Water Resource Depletion, Water-related Conflicts and Impacts on Farmers in the Lake Chad Basin: Improving local capacity towards achieving water and food security in Nigeria</td> </tr> </table> <hr/> <p>Q&A</p> <table> <tr> <td>Conallin et al</td> <td>Capacity Building through Research: Building the capacity of developing country practitioners while providing the knowledge needed to make evidence-based decisions for sustainable development.</td> </tr> <tr> <td>Maphutha et al</td> <td>Building fit for purpose Water Services Authorities in the Republic of South Africa</td> </tr> <tr> <td>Shaidi & Mullan</td> <td>Infrastructure resilience planning in Developing countries</td> </tr> <tr> <td>Iroegbu et al</td> <td>Achieving SDG 6 and other related goals: Strategies for Gender focus Engagement</td> </tr> </table> <hr/> <p>Q&A</p> <table> <tr> <td>Desai et al</td> <td>Multi-stakeholder initiative to provide drinking water security through springshed management in 100 villages of Nagaland</td> </tr> <tr> <td>Xie & Li</td> <td>Conflictual ideas in China’s negotiation over international rivers</td> </tr> <tr> <td>van Dijk & Zhang</td> <td>Successful cooperation between Chinese and Dutch scholars and academic institutions in the field of water and the environment</td> </tr> <tr> <td>Ragavan</td> <td>Developing capacities of the State and the Urban Local Bodies (ULBs) for faecal sludge treatment plant implementation quality assurance.</td> </tr> </table> <hr/> <p>Q&A</p>	Kale & Chemburkar	Demystifying Groundwater Science and Building Institutions for Sustainable Aquifer Management	van Nieuwaal et al	From capacity development to implementation science in urbanizing deltas	Nguyen et al	Transitioning to climate – resilient and sustainable livelihoods in the Vietnamese Mekong delta: barriers and the way forward	Viacheslav & Bolko	Role of Hydrometeorological Sciences in a Capacity Development of Water-Depended Sectors of Economy: Ukrainian Reality and Perspective	Kunlere & Kunlere	Climate Change, Water Resource Depletion, Water-related Conflicts and Impacts on Farmers in the Lake Chad Basin: Improving local capacity towards achieving water and food security in Nigeria	Conallin et al	Capacity Building through Research: Building the capacity of developing country practitioners while providing the knowledge needed to make evidence-based decisions for sustainable development.	Maphutha et al	Building fit for purpose Water Services Authorities in the Republic of South Africa	Shaidi & Mullan	Infrastructure resilience planning in Developing countries	Iroegbu et al	Achieving SDG 6 and other related goals: Strategies for Gender focus Engagement	Desai et al	Multi-stakeholder initiative to provide drinking water security through springshed management in 100 villages of Nagaland	Xie & Li	Conflictual ideas in China’s negotiation over international rivers	van Dijk & Zhang	Successful cooperation between Chinese and Dutch scholars and academic institutions in the field of water and the environment	Ragavan	Developing capacities of the State and the Urban Local Bodies (ULBs) for faecal sludge treatment plant implementation quality assurance.
Kale & Chemburkar	Demystifying Groundwater Science and Building Institutions for Sustainable Aquifer Management																										
van Nieuwaal et al	From capacity development to implementation science in urbanizing deltas																										
Nguyen et al	Transitioning to climate – resilient and sustainable livelihoods in the Vietnamese Mekong delta: barriers and the way forward																										
Viacheslav & Bolko	Role of Hydrometeorological Sciences in a Capacity Development of Water-Depended Sectors of Economy: Ukrainian Reality and Perspective																										
Kunlere & Kunlere	Climate Change, Water Resource Depletion, Water-related Conflicts and Impacts on Farmers in the Lake Chad Basin: Improving local capacity towards achieving water and food security in Nigeria																										
Conallin et al	Capacity Building through Research: Building the capacity of developing country practitioners while providing the knowledge needed to make evidence-based decisions for sustainable development.																										
Maphutha et al	Building fit for purpose Water Services Authorities in the Republic of South Africa																										
Shaidi & Mullan	Infrastructure resilience planning in Developing countries																										
Iroegbu et al	Achieving SDG 6 and other related goals: Strategies for Gender focus Engagement																										
Desai et al	Multi-stakeholder initiative to provide drinking water security through springshed management in 100 villages of Nagaland																										
Xie & Li	Conflictual ideas in China’s negotiation over international rivers																										
van Dijk & Zhang	Successful cooperation between Chinese and Dutch scholars and academic institutions in the field of water and the environment																										
Ragavan	Developing capacities of the State and the Urban Local Bodies (ULBs) for faecal sludge treatment plant implementation quality assurance.																										
	TOWARDS AN IMPLEMENTATION SCIENCE																										
	<table> <tr> <td>Eddy Moors</td> <td>Introduction</td> </tr> <tr> <td>Rapporteur 1</td> <td>Setting the stage session</td> </tr> <tr> <td>Rapporteur 2</td> <td>Roundtable 1</td> </tr> <tr> <td>Rapporteur 3</td> <td>Roundtable 2</td> </tr> <tr> <td>Rapporteur 4</td> <td>Poster session</td> </tr> <tr> <td>All</td> <td>Q&A and Next steps</td> </tr> </table>	Eddy Moors	Introduction	Rapporteur 1	Setting the stage session	Rapporteur 2	Roundtable 1	Rapporteur 3	Roundtable 2	Rapporteur 4	Poster session	All	Q&A and Next steps														
Eddy Moors	Introduction																										
Rapporteur 1	Setting the stage session																										
Rapporteur 2	Roundtable 1																										
Rapporteur 3	Roundtable 2																										
Rapporteur 4	Poster session																										
All	Q&A and Next steps																										
14:00-16:00	TRACK 2: CAPACITY TO OPERATE UNDER COMPLEXITY AND UNCERTAINTY																										
	ROLE OF INSTITUTIONS AND RESEARCH IN DEALING WITH UNCERTAINTY																										
14:00-15:00	<p>WEBINAR: ROLE OF INSTITUTIONS AND RESEARCH IN DEALING WITH UNCERTAINTY</p> <hr/> <table> <tr> <td>Håkan Tropp</td> <td>Welcome and introduction</td> </tr> <tr> <td>#134 Moraes Carvalho & van Tulder</td> <td>TRIPARTITE PARTNERSHIPS AND THE WICKEDNESS OF THE WATER AND SANITATION SECTOR IN BRAZIL: AN INSTITUTIONAL ANALYSIS</td> </tr> <tr> <td>#143 Shafiei et al</td> <td>Conceptual Framework to Improve Research and Development (R&D) Performance: Case Study of Mashhad Water and Wastewater Company in Iran</td> </tr> </table>	Håkan Tropp	Welcome and introduction	#134 Moraes Carvalho & van Tulder	TRIPARTITE PARTNERSHIPS AND THE WICKEDNESS OF THE WATER AND SANITATION SECTOR IN BRAZIL: AN INSTITUTIONAL ANALYSIS	#143 Shafiei et al	Conceptual Framework to Improve Research and Development (R&D) Performance: Case Study of Mashhad Water and Wastewater Company in Iran																				
Håkan Tropp	Welcome and introduction																										
#134 Moraes Carvalho & van Tulder	TRIPARTITE PARTNERSHIPS AND THE WICKEDNESS OF THE WATER AND SANITATION SECTOR IN BRAZIL: AN INSTITUTIONAL ANALYSIS																										
#143 Shafiei et al	Conceptual Framework to Improve Research and Development (R&D) Performance: Case Study of Mashhad Water and Wastewater Company in Iran																										
15:00-16:00	VIDEO CONFERENCE: INSTITUTIONS AND DATA-DRIVE LEARNING UNDER UNCERTAINTY																										
	<table> <tr> <td>Håkan Tropp</td> <td>Welcome and introduction</td> </tr> <tr> <td>#129 Shiva et al</td> <td>Assessment of Capacity Building Initiatives for Key Stakeholders in India: Insights into Rural Water & Sanitation</td> </tr> <tr> <td>#125 Yu & von Gnechten</td> <td>The Limits of Institution Building in Water Resource Management</td> </tr> <tr> <td>#58 del Pozo & Bessembinder</td> <td>Capacity building on the use of climate data for the water sector</td> </tr> </table>	Håkan Tropp	Welcome and introduction	#129 Shiva et al	Assessment of Capacity Building Initiatives for Key Stakeholders in India: Insights into Rural Water & Sanitation	#125 Yu & von Gnechten	The Limits of Institution Building in Water Resource Management	#58 del Pozo & Bessembinder	Capacity building on the use of climate data for the water sector																		
Håkan Tropp	Welcome and introduction																										
#129 Shiva et al	Assessment of Capacity Building Initiatives for Key Stakeholders in India: Insights into Rural Water & Sanitation																										
#125 Yu & von Gnechten	The Limits of Institution Building in Water Resource Management																										
#58 del Pozo & Bessembinder	Capacity building on the use of climate data for the water sector																										
14:00-16:00	TRACK 3: CAPACITY FOR MANAGING CONFLICT AND NEGOTIATION																										

	NO LIVE PROGRAMME
14:00-16:00	TRACK 4: CAPACITY IN UTILITIES AND OTHER INSTITUTIONS TO ACHIEVE THE 'LAST MILE' OF THE SDGs
	PARTNERSHIPS IN IMPLEMENTING SDGs
14:00-16:00	WEBINAR: PARTNERSHIPS IN IMPLEMENTING SDGs <hr/> #101 van Meijeren & Rolf Co-creating capacities for improved water management <hr/> #127 Holtslag & McGill SMART Centres. A fast expanding concept for training in market based, affordable water technologies <hr/> #161 Bori et al Collective action for the WASH SDGs: learning lessons from change processes in four countries
TBD	VIDEO CONFERENCE: RECOMMENDATIONS
	Invited participants discuss recommendations for the Delft Agenda
10:00-12:00 and 14:00-16:00	TRACK 5: CAPACITY BUILDING FOR WATER FINANCE
	NEEDS AND CAPACITY BUILDING IN WATER FINANCE
10:00-11:10	WEBINAR: THE OPPORTUNITY AND NEEDS FOR WATER FINANCE 1 <hr/> #221 Michelle Hiestermann Knowledge management and social learning as an essential component to unlocking investment in ecological infrastructure for water security in South Africa <hr/> #13 Tagelsir Mohamed Gasmelseid Strengthening institutional capacity and knowledge sharing in water systems using blockchain technologies
11:10-12:00	WEBINAR: THE OPPORTUNITY AND NEEDS FOR WATER FINANCE 2 <hr/> Vijay Padmanabhan (ADB): Examples of projects (in or outside the water sector) that have successfully blended development and private finance. <hr/> Panel discussion with: Vijay Padmanabhan (ADB), Jean-Pierre Sweerts (Water Finance Facility), Arthur Gleijm/Michel Leushuis (Rebel)
14:00-14:40	WEBINAR: CAPACITY BUILDING TO CATALYSING WATER FINANCE 1 <hr/> Joseph Murabula Lessons and insights from KIFFWA model on water finance
14:40-16:00	WEBINAR: CAPACITY BUILDING TO CATALYSING WATER FINANCE 2 <hr/> Panel discussion with: Ger Bergkamp (Climate Fund Managers), Matt Morrison (Water.org), Maarten Blokland (Water Finance Facility), Guy Alaerts and Yong Jiang (IHE) Final conclusions and recommendations
14:00-16:00	TRACK 6: ACCELERATING KNOWLEDGE SHARING AMONG ORGANIZATIONS IN CIVIL SOCIETY
	RECOMMENDATIONS
14:00-16:00	WEBINAR: RECOMMENDATIONS
TBD	VIDEO CONFERENCE: RECOMMENDATIONS
	Invited participants discuss recommendations for the Delft Agenda
ANY TIME	TRACK 7: ENHANCING COMPETENCE DEVELOPMENT IN EDUCATION AND TRAINING
	RECOMMENDATIONS
14:00-16:00	WEBINAR: RECOMMENDATIONS
14:00-16:00	TRACK 8: USING 'BIG DATA', ICT, AI AND E-BASED TOOLS
	DATA AND TOOLS FOR WATER APPLICATIONS

14:00-15:00	WEBINAR: DATA AND TOOLS FOR WATER APPLICATIONS	
	Chapman	Global Capacity Development in Water Quality Monitoring and Assessment
	#43 Altobelli et al	EVALUATING FEATURES OF THE TOOLS FOR IMPROVED IRRIGATION MANAGEMENT TO ENHANCE THEIR WIDER ADOPTION
	#182 Taylor et al	Stream Assessment Scoring System (miniSASS): healthy rivers, healthy people
#198 Jimoh & Bilewu	Safe Drinking Water Literacy: Between the drinking water company and the consumers	
15:00-16:00	VIDEO CONFERENCE: RECOMMENDATIONS	
	Invited participants discuss recommendations for the Delft Agenda	
	TRACK 9: FROM THE COMMUNITY	
ANY TIME	THE DIGITAL DIVIDE – EXPERIENCES AND EXPERIMENTS WITH VIRTUAL EVENTS	
14:00-16:00	GENDER MATTERS: ORGANISATIONAL IMPLEMENTATION & CAPACITY DEVELOPMENT
